DOM to Selenium

Request:

```
{
  "messages": [
    {
      "role": "user",
      "content": "Extract the below given DOM : \n\n<input type=\"text\" class=\"inputBox\" name=\"companyName\" size=\"30\" maxlength=\"100\" id=\"createLeadForm_companyName\">\n<input type=\"text\" class=\"inputBox\" name=\"lastName\" size=\"30\" maxlength=\"100\" id=\"createLeadForm_lastName\">\n<input type=\"text\" class=\"inputBox\" name=\"firstName\" size=\"30\" maxlength=\"100\" id=\"createLeadForm_firstName\">\n<input type=\"submit\" class=\"smallSubmit\" name=\"submitButton\" value=\"Create Lead\" id=\"ext-gen630\"> and provide me the selenium java code. Instructions: Do not use ID if the value has number in it. Provide only java code and no explanations needed"
    }
  ],
  "model": "openai/gpt-oss-20b",  // given this model and it worked
  "temperature": 0.1,
  "include_reasoning":true
}
```

Response:

```
{
    "id": "chatcmpl-036c7960-d622-4597-93de-145f01e8b6ef",
    "object": "chat.completion",
    "created": 1776270547,
    "model": "openai/gpt-oss-20b",
    "choices": [
        {
            "index": 0,
            "message": {
```

"role": "assistant",

"content": "```java\nimport org.openqa.selenium.By;\nimport org.openqa.selenium.WebDriver;\nimport org.openqa.selenium.WebElement;\nimport org.openqa.selenium.chrome.ChromeDriver;\n\npublic class CreateLeadTest {\n   public static void main(String[] args) {\n   System.setProperty(\"webdriver.chrome.driver\", \"/path/to/chromedriver\");\n   WebDriver driver = new ChromeDriver();\n\n   driver.get(\"http://example.com/leadForm\");\n\n   WebElement companyName = driver.findElement(By.id(\"createLeadForm_companyName\"));\n   WebElement lastName = driver.findElement(By.id(\"createLeadForm_lastName\"));\n   WebElement firstName = driver.findElement(By.id(\"createLeadForm_firstName\"));\n\n   companyName.sendKeys(\"Acme Corp\");\n   lastName.sendKeys(\"Doe\");\n   firstName.sendKeys(\"John\");\n\n   WebElement submitButton = driver.findElement(By.xpath(\"//input[@value='Create Lead' and @class='smallSubmit']\"));\n   submitButton.click();\n\n   driver.quit();\n   }\n}\n```",

"reasoning": "We need to extract the DOM elements and provide Selenium Java code. The instruction: \"Do not use ID if the value has number in it.\" So for elements with id containing numbers, we should not use ID. The IDs: createLeadForm_companyName (no number), createLeadForm_lastName (no number), createLeadForm_firstName (no number), ext-gen630 (has number). So for the submit button, we should not use ID. Use other locators: maybe by name or class or value. For the input fields, we can use ID or name. But instruction says \"Do not use ID if the value has number in it.\" That only applies to IDs with numbers. So we can use ID for the first three. For the submit button, we can use name or value or class. Provide only Java code, no explanations. So code snippet: import statements, class, main method, driver initialization, find elements, maybe send keys, click. Provide minimal code. Use WebDriver driver = new ChromeDriver(); etc. Provide code. Ensure no explanation. Let's produce code."
